

Fact Sheet: Broadmoor Recovery Roads Program

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of \$55.2M. The total cost of Phase I repairs completed in Broadmoor totaled approximately \$650,000.

Phase II: The Broadmoor Recovery Roads program will include multiple construction repair projects with a total estimated value of approximately \$6.7 M for roadway improvements. Design of the future road repairs is underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. In Broadmoor, construction is currently scheduled to begin in early 2015 and last through early 2016. Road resurfacing work will be limited in some areas of Broadmoor.

What to expect during construction:

Residents and businesses in Broadmoor should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. Digital Engineering and Imaging, Inc. is designing road improvements in the Broadmoor area. The construction contract is scheduled to be available for bid in late 2014.

Funding Facts:

Neighborhood Area	Phase of Work	Consultants	Total Estimated Repairs
Phase I Completed Repairs	Completed	NA	\$650,000
Phase II Repairs	Geotechnical Survey	Ardaman and Associates	\$6.7 M *
	Design	Digital Engineering and Imaging, Inc.	
	Construction	TBD	
TOTAL Repairs—Broadmoor			\$7,350,000*

* FEMA inspectors will be working onsite with the City's design and construction contractor teams. During construction they are likely to identify additional storm damages that may be eligible for repair. In many cases it is likely the scope of work may be adjusted to include additional repairs.
